LEO

Tame Your Documents

LEO uses controlled vocabularies to automatically index and tag your files, making document management and searching more effective.
LEO is part of Minerva's TERRA Mining AI Suite.

WE HELP YOU

FIND YOUR DOCUMENTS EFFICIENTLY

Many companies have gigabytes to terabytes of unstructured, unorganized documents. The LEO system helps users at all levels of the organization find and utilize their documents.

WE PROVIDE

QUICK INDEXING, TAGGING & SEARCHING OF YOUR DOCUMENTS

Automatically index and custom-tag your documents so they can be efficiently found by multi-disciplinary groups across your organization.

OUR METHOD

PERSONALIZED VOCABULARIES FOR SEMANTIC SEARCH

Uses personalized vocabularies and labels to customize the system to your needs. To optimize document retrieval, both semantic and Elasticsearch methods are used.
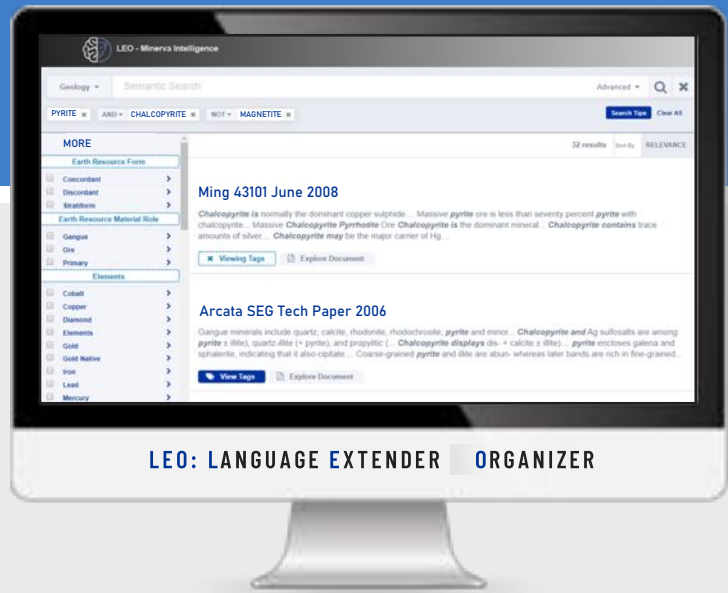

WHY US

MINERVA INTELLIGENCE

"TRADITIONALLY, GEOLOGISTS COULD SPEND UP TO 80% OF THEIR TIME SEARCHING FOR AND PREPARING DATA, AND ONLY 20% INTERPRETING AND ANALYZING THE DATA." Mining World Magazine, 2019

LEO has additional functionality that a traditional index & search program doesn't offer. Unstructured documents are indexed against personalized vocabularies, enhancing both search order and content.
